EDR RADIUS REPORT SUMMARY

COMMON ACRONYMS AND ABBREVIATIONS

AAI – All Appropriate Inquiries

ACM - Asbestos-Containing Material

AST – Aboveground Storage Tank

ASTM - American Society for Testing Materials International

BER - Business Environmental Risk

bgs - Below Ground Surface

CERCLA - Comprehensive Environmental Response, Compensation, and Liability Act

CESQG - Conditionally Exempt Small Quantity Generator

CFR - Code of Federal Regulations

CP-51 - (NYSDEC) Commissioner's Policy #51 (Soil Cleanup Guidance)

CREC - Controlled Recognized Environmental Condition

DEC – Department of Environmental Conservation

EDR – Environmental Data Resources (Company)

ESA - Environmental Site Assessment

FOIA/FOIL - Freedom of Information Act/Law

GIS – Geographic Information Systems

GWS - Groundwater Standard

HREC – Historical Recognized Environmental Condition

LBP - Lead-Based Paint

LQG - Large Quantity Generator

N/A - Not Applicable

NRCS - Natural Resource Conservation Service

NYSDEC - New York State Department of Environmental Conservation

PAH - Polycyclic Aromatic Hydrocarbons

PCB - Poly-Chlorinated Biphenyls

pCi/L - Picocuries per Liter

ppb - Parts Per Billion

ppm - Parts Per Million

RCRA - Resource Conservation and Recovery Act

REC – Recognized Environmental Condition

RSCO - Restricted Soil Cleanup Objective

SCO - Soil Cleanup Objective

SQG - Small Quantity Generator

SVOC - Semi-Volatile Organic Compound

TOGS – Technical & Operational Guidance Series 1.1.1 (NYSDEC)

USDA - United States Department of Agriculture

USEPA – United States Environmental Protection Agency

USGS – United States Geological Survey

UST – Underground Storage Tank

VOC - Volatile Organic Compound

68 Church Street, Canajoharie, NY

1.0 SUMMARY

This report presents the results of a Phase I ESA for the former Beech-Nut Foods manufacturing property located at 68 Church Street in the Village of Canajoharie, New York (the "Site" or "Property"). The 26.90 acre property supports a manufacturing plant (built in multiple stages throughout the 20th century) that encompasses most of the Property. The Site is situated near the center of the village, with the Mohawk River and Interstate 90 to the immediate north, along the former Erie Canal.

There were several significant data gaps identified during the course of this assessment. The User of this report is cautioned that due to the significant data gaps identified, this report does not meet the AAI requirements. However, based on the limited information gathered, this assessment identified the following RECs, in connection with the Site:

- The presence of cut and fill land to bring the site to its existing grade. The fill material has the potential to be of poor quality or contain contaminated material.
- Storage and/or generation of many types of hazardous waste including chlorinated solvents, heavy metals, and pesticides/herbicides (including banned herbicides) suggests their past use on the Site
- Historical and long-term storage of coal, including multiple coal pockets throughout the Site
- The presence of a rail line into the Site
- Historical carpentry, blacksmith, and paint/repair shops where hazardous materials were likely stored and used on and proximal to the Site
- A "junk heap" shown (in 1915) in what is now the middle of the Beechnut facility
- Multiple petroleum storage tanks throughout the Site
- Multiple gasoline tanks located on adjacent properties that are upgradient to the southeast of the Site

No HRECs or CRECs were identified in connection with the Site.

This summary does not contain all of the information or findings presented in this report. In order to acquire a more complete understanding of the information and findings presented, AECC strongly recommends that the Client and other interested parties read the report in its entirety.

68 Church Street, Canajoharie, NY

2.0 INTRODUCTION

This report presents the results of a Phase I ESA for the former Beech-Nut Foods facility (the "Site" or "Property"). The location of the property in relation to major roads and other points of reference is indicated on Figure 1 (Site Plan).

2.1 PURPOSE

The purpose of a Phase I ESA is to compile and review available and relevant information about the Site and immediate vicinity, and to identify RECs, HRECs, and CRECs to the extent feasible pursuant to ASTM E1527-13. According to the ASTM Standard, a REC is defined as:

"...the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions."

An HREC is defined as:

"[A] past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."

And a CREC is defined as:

"[A] recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."

In addition, the ASTM E1527-13 defines a *de minimis* condition as:

"[A] condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* conditions are not [RECs] nor [CRECs]."

Lastly, pertinent to the scope of this assessment, ASTM E1527-13 defines a BER as:

"[A] risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice."

68 Church Street, Canajoharie, NY

2.2 REASON FOR PERFORMING THE ESA

The ESA was performed to identify environmental conditions associated with the Site prior to a municipality taking possession of the Site due to back taxes.

2.3 SCOPE OF SERVICES

The scope of services for this ESA is as defined by the ASTM E1527-13 and AAI standards, with limitations as noted in Section 2.4.

Refer to Appendix B (Standard Clauses and Disclaimers) for further information regarding the purpose, scope, reliance, deviations, and limiting conditions regarding this assessment.

2.4 SIGNIFICANT ASSUMPTIONS AND LIMITATIONS

AECC has made the following significant assumptions. Data gaps are presented in Section 7.1, and other general assumptions and limitations are listed in Appendix B.

- AECC was not permitted access to the subject site. Therefore, no physical inspection of the site
 has been conducted for this Phase I ESA.
- Groundwater flow is estimated based upon area topography, nearest surface water in the vicinity
 of the Site, local USGS well data, and/or EDR proprietary information. AECC did not measure
 groundwater elevations to confirm groundwater flow direction at the subject property.
- Soil and bedrock data in Section 3.1 were obtained from the USDA NRCS soil survey website and / or EDR report. AECC did not verify with exploratory borings, pits, trenches, or wells.
- Unless otherwise stated, all interior drains are assumed to be connected to a municipal sanitary sewer, and all exterior drains are assumed to be connected to a storm sewer. Associated piping is assumed to be intact and water tight.
- AECC was not allowed to contact the current owner of the Site.

2.5 USER RELIANCE

This ESA report has been prepared by AECC for the express use of Laberge Group (Laberge) and Montgomery County. No other parties shall rely on this report without the written consent from AECC. Laberge may release this report to third parties; however, such third party, in using this report, shall have no legal recourse against AECC.

2.6 REPORT FORMAT

The remainder of this report is organized so that pertinent findings are located within the body of the report, and the opinions of the environmental professional are located either immediately after each finding or at the end of each section. It is possible that findings reference information presented in other sections of the report.

68 Church Street, Canajoharie, NY

3.0 SITE AND AREA CHARACTERISTICS

AECC was not provided with a copy of the legal description of the site.

The following tables describe the general Site characteristics, buildings, utilities, and waste streams:

Category	Subject Property Data							
Ownership	TD Development, LLC							
Site Address	68 Church Street, Village of Canajoharie, Montgomery County, New York							
Mailing Address	68 Church Street, Canajoharie, New York 13317							
Tax ID Number	63.14-1-9.1							
Size and Area	26.90 acres							
Access	Via Church Street (NY 10) and East Main Street (NY 5S)							
Zoning/Land Use	Manufacturing							
Easements	Unknown							

Category	Building Information						
Number of Buildings	Sprawling Manufacturing / Industrial complex.						
Gross Floor Area	Unknown						
Number of Stories	Single story in areas, multiple in others						
Basement Present?	Unknown, but assumed yes						
Roof Type	Multiple. Mostly flat roof / rolled roofing, or aluminum						
Current Uses	Vacant						
Construction Date	In phases throughout 20 th century						

Utility	Provider/Source						
Potable Water Supply	Municipal water						
Wastewater / Sewage	Municipal sewer						
Electrical Service	National Grid						
Natural Gas Service	National Grid						
Oil Service	N/A						
Heating/Cooling Systems	Unknown						
Emergency Power	Unknown						
Stormwater System	Unknown						

Classification	Waste Generation Process	Storage Location	Disposal Method / Contractor			
Non-regulated Solid Waste Non-regulated Liquid Waste	None currently. Waste handling and disposal practices during historical operations are unknown.					
Regulated Solid / Liquid Waste						
Biomedical Waste	N/A N/A N/A					

3.1 PHYSICAL SETTING - SITE TOPOGRAPHY, GEOLOGY, AND HYDROGEOLOGY

According to the (2013) USGS Topographic Map - Canajoharie Quadrangle, the Site is at an elevation of approximately 300 feet above mean sea level. Based solely on topographic maps, the Site appears to be generally flat and the area in the vicinity of the property trends gradually downward to the north

68 Church Street, Canajoharie, NY

and the Mohawk River. The nearest surface water is the Canajoharie creek that flows south to north bisecting the site, which then discharges into the nearby Mohawk River, which flows west to east approximately 300 feet to the north of the Site. AECC used the USDA Web Soil Survey Database to obtain the following information regarding soils at the Site:

Geological and Hydrogeological Properties							
Surface Soil	Cut and Fill Land						
Hydric Soil ?	ot hydric						
Assumed Groundwater Flow Direction	Towards Canajoharie creek that bisects site flowing south to north and north towards the nearby Mohawk river						
Depth to Groundwater	Approximately 54 inches						
Depth to Bedrock	>78 inches						

The presence of cut and fill land indicates the potential use of poor-quality material to bring the site to current grade, and represents a REC.

68 Church Street, Canajoharie, NY

4.0 RECORDS REVIEW

Records reviewed for this ESA included previous reports pertaining to the Site (if any), standard environmental databases, and reasonably-ascertainable historical information. The information gathered from the review of these documents is described in the following sections.

4.1 USER-PROVIDED RECORD SOURCES

ASTM E1527-13 requires the User of the ESA to provide the following record sources for review, when possible:

Record Source	Provided to AECC	Identified Elsewhere	Significant Findings
Title Records	No	No	Data Gap (see Section 7.1)
Knowledge of Environmental Liens or Activity and Use Limitations	No	No	Data Gap (See Section 7.1)
Property Value	No	No	Data Gap (See Section 7.1)
Knowledge of Previous Environmental Reports	No	No	The User did not provide any previous environmental reports, and no reports were identified by AECC during the investigation. AECC was asked not to contact the current owner during preparation of this report. See Data Gap (Section 7.1)
Building Plans	No	No	Data Gap (See Section 7.1)

By use of a questionnaire, the User was asked to provide the reason for performing the Phase I ESA (see Section 2.2), any known environmental liens or activity / use limitations, specialized / actual knowledge, commonly known or reasonably ascertainable information, previous environmental reports, and relation of the purchase price vs. fair market value. The questionnaire was not returned to AECC.

4.2 ENVIRONMENTAL RECORD SOURCES

AECC retained Environmental Data Resources (EDR) of Milford, Connecticut, to search federal, state, and tribal environmental regulatory databases. The radii of the database searches corresponded to the recommended radii in ASTM E1527-13.

Further description of the databases, are included in the EDR report (see Appendix I).

68 Church Street, Canajoharie, NY

4.2.1 On-Site

The EDR database report indicates the Site is listed in numerous regulatory databases including RCRA (Beechnut is identified as a large quantity generator of hazardous waste); Chemical Bulk Storage, leaking underground storage tanks, SPILLS, FINDS, and AIRS (permitted air emissions). While the site is listed in these databases, it should be noted that minimal violations were listed in most of the entries.

The RCRA / Manifest summary information indicates that a variety of hazardous wastes were generated at the Site including heavy metals (arsenic, cadmium, chromium, lead, mercury, etc.), numerous organic solvents, corrosive wastes, ignitable wastes, herbicides including Silvex (2,4,5-TP), pesticides including Aldicarb, and other hazardous wastes. It should be noted there were no formal RCRA violations for the Site listed in the regulatory database. However, the presence of banned pesticides and other herbicide / pesticides, several organic solvents, and heavy metals in the waste stream records constitutes a REC. If these compounds were stored on Site and were disposed of, it is probable that they were used at the Site. In particular, the herbicides and pesticides may have been used at the Site and residual impacts may be present in Site soils. Additionally, the Canajoharie Creek runs through the Site and use of these products may also have impacted creek sediments and surface waters via direct application along the waterway or storm water runoff.

Chemical Bulk Storage (CBS) tanks present at the site include three (3) 1,500-gallon above ground tanks (ASTs) containing sodium hydroxide, and one (1) underground 1,600-gallon tank containing ammonia. All four CBS tanks are located inside the plant buildings. All are identified as "in service". There are no violations identified in the database associated with CBS at the Site.

There are two incidents identified at the property including an underground storage tank (UST) containing gasoline and a hoist thermometer. On December 16, 1987 the gasoline UST failed a tightness test. The tank was removed, minimal impacts were noted, and the spill file was closed on April 15, 1988. The second spill was a release of approximately 50 grams of mercury from a hoist thermometer on February 6, 1991, which was contained and cleaned up, and the spill file was closed on February 13, 1991. Note that the FINDS, SPILLS, and NY LTANKS databases also refer to the same two events. There are no other records on NYSDEC website searches or the EDR databases relative to releases at the Site.

The history of chemical and petroleum bulk storage at the site and the use and handling of numerous hazardous chemicals represents a REC.

4.2.2 Off-site

AECC reviewed each listing in the EDR Radius report, although the sites considered of primary concern were those potential releases that were located adjacent to, and / or hydraulically upgradient of the Site (see Section 3.1).

In addition, EDR provided a list of properties that could not be located due to incomplete address information (Orphan Sites). AECC reviewed this list and obtained information for those properties that were obviously located at or near the target Site.

Based on the presumed northward direction of groundwater flow in the vicinity of the Site, and the elevation of surrounding properties, AECC deduced that properties with the greatest potential to impact soil and groundwater at the Site are located to the south, east, or west of the Site. Sites across the Mohawk River to the north are not considered to be of concern.

68 Church Street, Canajoharie, NY

Properties located greater than one-quarter mile from the target property are not expected to significantly impact the target property due to the distance between the listed sites and the target property, apparent direction of area groundwater flow, lack of violations at the respective facilities, development between the property-of-concern and the target Site, and / or remedial activities conducted to date.

Records of releases from numerous off-site properties with potential to impact the subject Site are also noted in the database report. Of concern are sites with leaking tanks and spills, five of which are located at higher elevations than the Site and have potential to impact groundwater quality beneath the Site. All are located within 1,700 feet of the Site.

4.3 GOVERNMENTAL RECORDS

AECC contacted the following federal, state, and local agencies under the FOIA / FOIL, requesting information pertaining to environmental conditions at, or in the vicinity of, the target property. FOIA / FOIL requests and responses are presented in Appendix D, and are summarized in the table below. In addition, in lieu of a FOIA request to the USEPA, AECC reviewed the USEPA's Enforcement and Compliance History Online (ECHO) web-based search tool.

Agency	Significant Findings							
LICEDA ECLIO	The USEPA-ECHO database does not list any current or outstanding violations within the Beech-Nut facility report.							
USEPA-ECHO	The database search yielded no facilities with known violations or compliance issues within at least ½ mile of the subject Site.							
	AECC requested records related to the spill numbers identified in the EDR database report, as well as any other records associated with the Beech-Nut Foods Facility and its associated UST, AST, and CBS programs.							
NYSDEC	Review of these files indicated a history of noncompliance with applicable NYSDEC rules and regulations regarding proper storage, labeling, and inventorying of hazardous chemicals and petroleum at the Site.							
WIODEO	PBS records of renewal indicate that there are the following (active) storage tanks located at the Site:							
	 Tank #1 – a 50,000-gallon AST storing #6 Fuel Oil for on-site consumption, installed in 1971 							
	 Tank #7 – a 250-gallon AST storing diesel fuel, installed in 1991 Tank #8 – a 385-gallon AST installed in 2000 (material stored is not known) 							

68 Church Street, Canajoharie, NY

NYS Department of Health (DOH)	AECC requested records related to on-site storage of hazardous substances and/or petroleum products (tank installations, registrations, etc.), on-site soil / groundwater contamination and remedial action documentation, on-site indoor air quality (asbestos, mold, radon, vapor intrusion), on-site land development (sewer / septic, water supply, SPDES, etc.), contaminated wells within 1/4 mile of the site, and landfills within 1/4 mile of the site. A response from the NYSDOH stated that certain records were redacted and/or withheld in accordance with New York Public Officers Law §87(2)(g). Records received were related to drinking water funding only.				
Town and Village of Canajoharie	AECC requested a property record card, Zoning / land use records, site / survey, land title records (including activity and/or use limitations), construction / demolition permits, environmental / legal action (including liens, notices violation, citations and/or penalties), storage of hazardou substances and/or petroleum products (e.g., tank installations, etc.), subsurface investigations (e.g., soil and/or groundwater testing), and w (e.g., public or private). An acknowledgement of receipt but no formal response from the Town of Canajoharie has been received as of the daths report.				
Montgomery County	AECC reached out to the Montgomery County clerk and Public Health Department for information regarding: - Storage of hazardous substances and/or petroleum products (tank installations, registrations, etc.) - Soil / groundwater contamination and remedial action documentation - Indoor air quality (asbestos, mold, radon, vapor intrusion) - Land development (sewer / septic, water supply, SPDES, etc.) - Contaminated wells within 1/4 mile of the site - Landfills within 1/4 mile of the site The county clerk referred the request to the Environmental District Office in Herkimer; the Public Health Department also referred AECC to the District Office for records.				
Environmental District Office for Montgomery County	A response from the Environmental District Office in Herkimer has not been received as of the date of this report.				
Canajoharie Volunteer Fire Department AECC requested information related to on-site storage of petro products. A response from the Department has not been received date of this report.					

In an effort to keep the report volume to a reasonable and manageable level, and due to restrictions in electronic file sizes, only some of the FOIA / FOIL requests and responses are presented in Appendix D. All of the FOIA / FOIL responses will be saved electronically on a Compact Disc to be attached to the hardcopy of this report.

4.4 HISTORICAL INFORMATION

A summary of historical information pertaining to the Site and surroundings, obtained from a review of standard historical sources listed in ASTM E1527-13, is presented in the tables below.

68 Church Street, Canajoharie, NY

4.4.1 Aerial Photographs

Historical Aerial photos are included as Appendix E.

Aerials from 1988, 1997 (two), 2006, 2008, 2009, and 2011 were supplied by EDR for review. All photos show the Site in its current configuration from a plant structure perspective. Given the scale of the photos and the relative quality of the images, it is not possible to isolate potential concerns based on the aerial photographs alone. The Site is shown as developed with permanent structures, remaining areas appear to be paved. The surrounding area does not demonstrate significant changes between 1988 and 2011.

4.4.2 Topographic Maps

EDR provided topographic maps from the years 1900 and 1944 for review. The 1900 map shows the area as being sparsely developed except in the immediate area of the Site where multiple residential properties are shown clustered near the Mohawk River and Erie Canal. Railroads are present along both banks of the Mohawk. Sensitive ecological receptors consist of the nearby surface waters (Mohawk River and Canajoharie Creek); no wetlands are identified on the 1900 map. The 1944 map is quite similar to the 1900 map with the exception of additional development in the general area of the Site.

AECC also located a 2013 topographic map from the USGS online database. Elevation trends at the site and in the vicinity of the site are similar to the previous map. There is significant roadway development in the intervening years, most notably the construction of the NYS Thruway (Interstate 90) that runs east-west to the immediate north of the site.

Elevation trends slightly downward towards the Canajoharie creek that bisects the site and the Mohawk River to the north of the site.

Historical Topographic Maps are included as Appendix F.

4.4.3 Sanborn Fire Insurance Maps

Historical Sanborn Fire Insurance Maps are included as Appendix G.

The most detailed Site development and operational history can be found in the Sanborn fire insurance maps, which included maps from the years 1884, 1891, 1897, 1902, 1908, 1915, 1926, and 1948. Consistent with a review of other historical sources (aerial photographs and topographic maps) the Site and surrounding area has changed very little in the years covered. Generally, the area in the vicinity of the Site was initially developed with minimal commercial / industrial activities and primary development consisted of residential dwellings proximal to the then-active Erie Canal. The following is a brief summary of map findings for the Site and surrounding area, summarized by the year of the respective map.

1884

The Site and surrounding area are developed with residential dwellings (including tenement houses), railroads, a coal business, a black smith, and a carpenters shop including lumber storage. Along the northern boundary of the Site is the Erie Canal. West Shore Railroad lines are located to the immediate south of the Site across East Main Street. With the exception of potential impacts from coal storage from the coal business located in the northwest corner of the current site, and the black smith

68 Church Street, Canajoharie, NY

business located within the current Site boundaries, no potential areas of concern are identified on the 1884 Sanborn map.

1891

The Site and surrounding areas are not significantly changed since 1884. Some of the residential structures are larger, some noted with ice houses now attached. The carpenter's shop and lumber storage are now identified as storage, the carpenter has moved to the northeast within the current Site boundary. The coal business (Jones Bros. Coal Pockets) has expanded and added new structures. Canajoharie Creek is shown to the west, running southwest to northeast. The remaining area is unchanged.

1897

The Site and surrounding area are not significantly changed since 1891. Jones Bros. Coal Pockets continues to expand operations in the northwest quadrant inside the current Site boundary. New commercial/industrial businesses including the Petit Manufacturing Company, which made chocolates and bonbons, was developed to the southeast, and the Mohawk Seed Company is located adjacent to Petit to the east. Public water service conduits are noted running along the western Site boundary.

1902

The Jones Bros. Coal Pockets appears to have further expanded to the east and structures including lumber storage, ice houses, small coal storage building, and scales are indicated. The carpenter and lumber storage building is one again indicated on the map, and the blacksmith remains at the same location. The map indicates that the Petit Manufacturing Company buildings were destroyed by a fire; some buildings remain and are used for storage. The Mohawk Seed Company, West Shore rail lines, and Erie Canal are indicated, but the Mohawk Seed Company is noted as not actively in business, with the building used for storage only.

1908

The 1908 map shows significant commercial development since 1902. Included are a grist mill, cider mill, and saw mill to the northeast, and J.C. Vosburgh Cider and Vinegar Company where Petit Manufacturing was formerly located (to the southeast). The blacksmith is in a different location further to the east; and a new paint and repair shop are located in the blacksmith's former location. A gun shop is now located in a tenement building along East Main Street. What was Canal Street is now renamed Jones Street, on which Jones Bros. Coal Pockets is located.

1915

The 1915 map shows the area essentially unchanged with few exceptions. The Beechnut Packaging Company appears for the first time across Jones Street immediately south of the Jones Bros. Coal Pocket facility, which is now shown as the Jones Bros. Coal and Wood Yard. A "junk heap" is located in the coal/wood yard, along Jones Street. The cider, lumber, and grist mill remain in the same location; the black smith has replaced the paint and repair shop; and a new Jones Bros. Coal Pocket has been established on East Main Street where the former gun shop / tenement building had stood. Details indicate a circular coal pocket with a conveyor extending from the railroad tracks immediately south of East Main Street. The former location of the Mohawk Seed company is now Fuller and Seeber Wet Wash Laundry. The building to the immediate east of the laundry facility is partially shown as a creamery.

1926

The 1926 map shows several significant changes. Jones Street has been renamed Poplar. A majority of the Beech-Nut facility is labeled as a garage, and a gasoline tank is located adjacent to the building (beneath Poplar Street). The Jones Bros. business and many of the associated structures are no

68 Church Street, Canajoharie, NY

longer shown on the map. The Vosburgh cider, lumber, and grist mill is now shown as only a cider mill. The Vosburgh grist mill has been relocated to a separate structure further to the east, and has been expanded. A gasoline tank is shown adjacent to the grist mill. The black smith and carpenter shops are no longer shown in their locations, though the blacksmith is now located across a new road called Old Tow Path (located where the Erie Canal was formerly shown on previous maps). The Jones Bros. Coal Pocket facility is now shown as the Timmerman and Son Coal Pocket, with operations expanded to include a store, an office, and an auto garage. The area along East Main Street used by Vosburgh is now shown as a timber yard, a building material storage area, several large vinegar tanks, and a hitch shed. The laundry facility is no longer shown, and a garage is shown in its place. A gasoline tank is located adjacent to the garage. The creamery is now shown as a milk can storage facility; specific information is not shown on the map.

1948

The 1948 map shows the Site close to its current configuration. All the business entities within the Site boundary (including the coal pocket, the blacksmith, and the cider mill) are no longer shown and the structures have been replaced with contiguous portions of the Beech Nut Packaging Company facilities. Multiple tanks are shown including two above ground oil tanks located along the northern property boundary towards the center of the site, as well as at least two gasoline tanks located at the motor truck loading area (southern boundary), one gasoline tank at the contractors' shop, and one gasoline tank at the garage (at a different location than the one shown on the 1926 map). A new rail spur has also been developed into the Site for direct rail loading. To the west, the site has developed corridors across the Canajoharie Creek to the far west portions of the facility. To the southeast, Vosburgh has constructed new buildings in what was formerly the timber storage yard. Two gasoline tanks are shown adjacent to the new buildings. The garage is now identified as an auto sales and service business. Two gasoline tanks are located where the previous (one) tank was shown in the 1926 map.

Based on the Sanborn map review of the Site and immediate vicinity depicted, the following RECs have been identified:

- Widespread use and storage of coal since at least 1884 through 1915
- The presence of a rail spur into the Site
- A "junk heap" shown (in 1915) in what is now the middle of the Beechnut facility
- Multiple petroleum storage tanks throughout the Site
- Historical paint and repair shops, carpentry, and blacksmith businesses located in several areas within the Site boundary
- Multiple gasoline tanks on adjacent properties to the southeast

4.4.4 City Directories

Historical City Directory Images are included as Appendix H.

EDR provided city directory summaries for the area in the vicinity of the Site. Directories for the following years were available: 1992, 1995, 1999, 2003, 2008, and 2013. In general agreement with the Sanborn maps from earlier years, properties on the target street and nearby cross streets appear as mixed residential and commercial, with few industrial businesses. The Village of Canajoharie Administrative offices are also located proximal to the Site. The only industries identified consist of Beechnut, and a candy manufacturer that changed names several times.

68 Church Street, Canajoharie, NY

4.4.5 Property Records

Reasonably ascertainable / reviewable historical property records (historic zoning, land title, building department, land use records, etc.) were not provided to AECC. AECC obtained the following historical ownership information from the Montgomery County Real Property Tax Service website:

Date of Sale	New Owner	Previous Owner
December 29, 2014	TD Development, Inc.	TD Development, LLC
December 5, 2013	TD Development, LLC	Beech-Nut Nutrition Corporation

4.5 OTHER RECORD SOURCES

Other additional reasonably ascertainable / reviewable historical records were not provided to or identified by AECC during this assessment.

68 Church Street, Canajoharie, NY

5.	0	SIT	ſΕ	R	F	C	ΩI	11/	VΔ	VI:	SS	ŞΔ	N	CE
•	v	UI I	_	1		v	•		•	۱.	v	,,	v v	\sim

AECC personnel were not granted access to the Site. This is considered a significant Data Gap (See Section 7.1).

68 Church Street, Canajoharie, NY

6.0 INTERVIEWS

AECC conducted interviews, prepared questionnaires and asked various parties questions pertaining to the current and historical uses of the Site. A summary of these interviews are summarized in the table below. A questionnaire given to Laberge was not returned to AECC.

AECC abided by the client's request to not contact the current or past owners of the Site

INTERVIEWS									
Name / Affiliation	Role	Method	Findings						
Richardson Brands	Neighboring Company	E-mail	AECC did not receive a response from Richardson that had knowledge of the Site.						
Mr. Chris Darling	Beech-Nut Director of Engineering	Telephone	Attempts to contact Mr. Darling were unsuccessful. A voicemail message was not returned to AECC.						
Ms. Kathleen Farquhar	Montgomery County Historian	Telephone E-mail	Attempts to contact Ms. Farquhar were unsuccessful and our messages were not returned.						

68 Church Street, Canajoharie, NY

7.0 EVALUATION

7.1 DATA GAPS

The following data gaps were encountered during the completion of this assessment:

Data Gap	Sources Consulted to Minimize Data Gap	Significance
AECC was unable to perform Site Reconnaissance activities	Historical aerial photographs and online photography	This is considered a significant data gap. Without being able to visually observe the Site and associated structures from the inside or observe them in their current condition a substantial amount of uncertainty and number of questions remain unanswered.
AECC was unable to contact the current or prior owners of the property	None	Significant. Previous owners are likely aware of the chemical and petroleum storage programs and how they were implemented at the Site. AECC was asked by the client not to contact the current Owner of the Site.
Questionnaires were not completed.	None	This is considered a significant data gap. The completion of a questionnaire by the Site Owner or User of the ESA is integral to the proper completion of the ESA.
AECC was not provided with an official property survey / legal description of the site, or building plans	GIS website, aerial photographs	Potentially significant, since property boundaries are only somewhat apparent from aerial photography and tax map information, and building plans could identify the location of storage tanks and drain discharge locations.
Environmental District Office for Montgomery County & New York State DOH FOIA responses have not been received.	Other governmental FOIA responses and records	Potentially significant. Information known by the Environmental District Office would likely be relevant to this investigation.

68 Church Street, Canajoharie, NY

7.2 ADDITIONAL SERVICES

No other additional services beyond the scope of ASTM E1527-13 were provided per this assessment.

7.3 CONCLUSIONS AND RECOMMENDATIONS

AECC has performed a Phase I ESA of the Former Beech-Nut Foods Facility, located at 68 Church Street, in the Village of Canajoharie, Montgomery County, New York, in conformance with the scope and limitations of ASTM Standard E 1527-13.

There were several significant data gaps identified during the course of this assessment. The User of this report is cautioned that due to the significant data gaps identified, this report does not meet the AAI requirements. However, based on the limited information gathered, this assessment identified the following RECs in connection with the Site:

- The presence of cut and fill land to bring the site to its existing grade. The fill material has the potential to be of poor quality or contain contaminated material.
- Storage and/or generation of many types of hazardous waste including chlorinated solvents, heavy metals, and pesticides/herbicides (including banned herbicides) suggests their past use on the Site
- Historical and long-term storage of coal, including multiple coal pockets throughout the Site.
- The presence of a rail line into the Site
- Historical carpentry, blacksmith, and paint/repair shops where hazardous materials were likely stored and used on and proximal to the Site
- A "junk heap" shown (in 1915) in what is now the middle of the Beechnut facility.
- Multiple petroleum storage tanks throughout the Site
- Multiple gasoline tanks located on adjacent properties that are upgradient to the southeast of the Site

No HRECs or CRECs were identified in connection with the Site.

De Minimis Conditions:

Since no Site Reconnaissance was performed, this assessment could not identify any *de minimis* conditions.

Further investigation is warranted. It is AECC's recommendation that access to the Site be arranged so that a site reconnaissance can be performed and site conditions noted.

68 Church Street, Canajoharie, NY

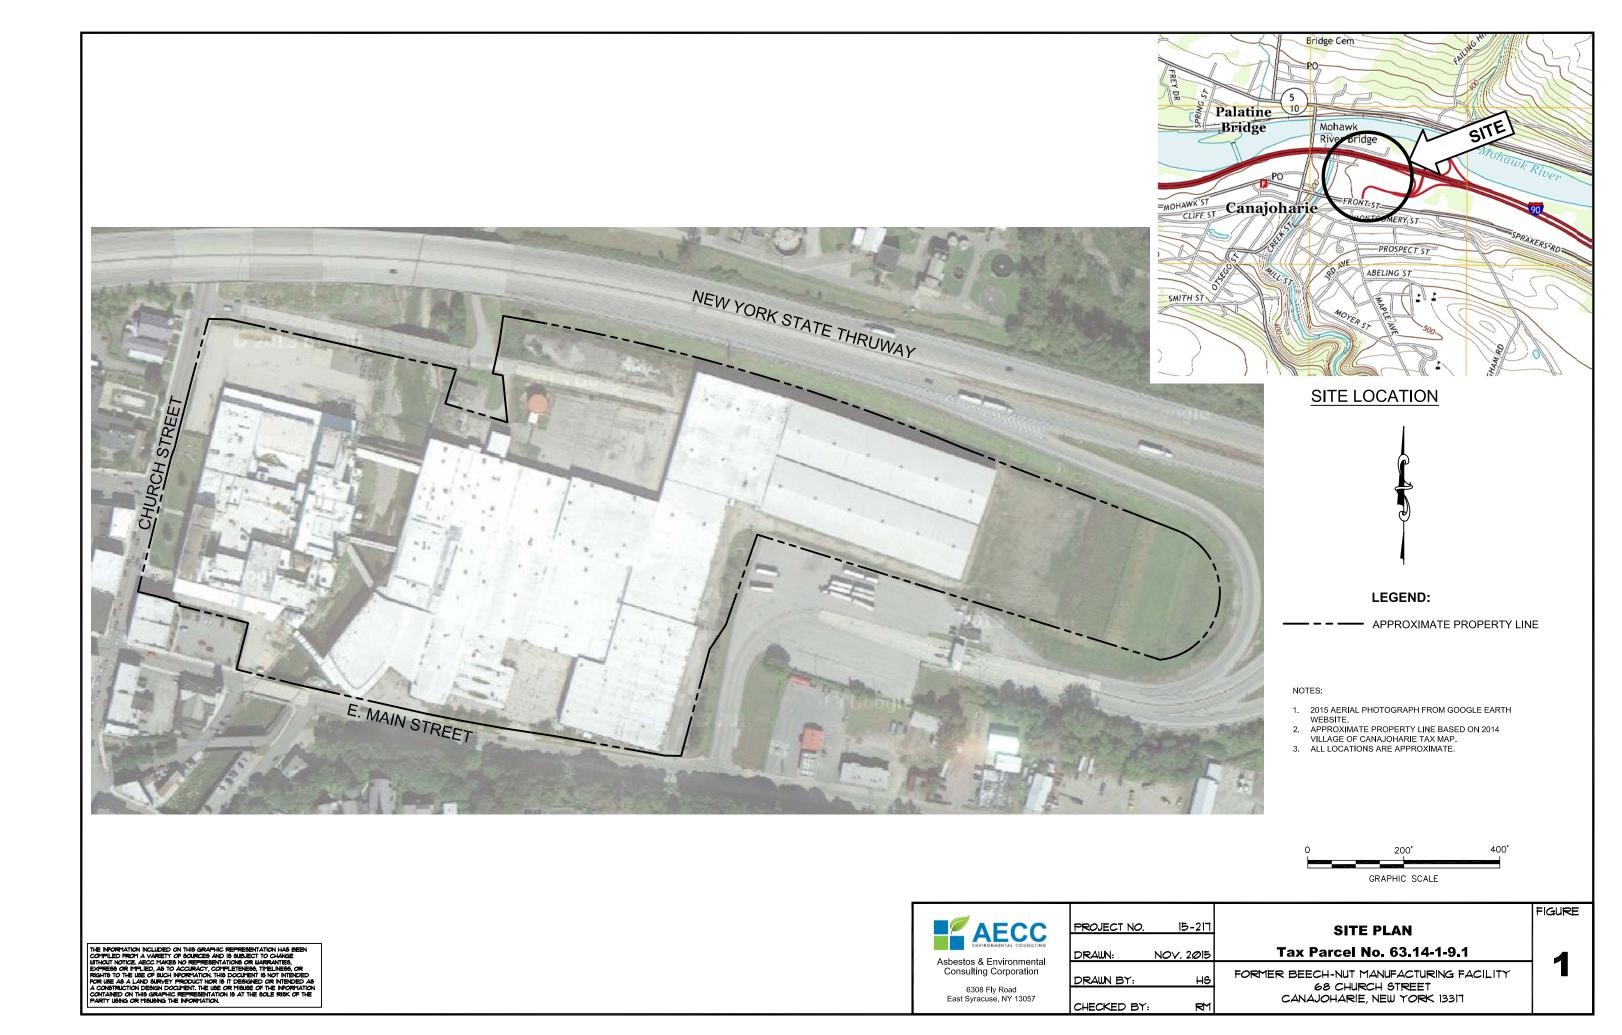

7.4 ENVIRONMENTAL PROFESSIONAL SIGNATURE AND STATEMENT

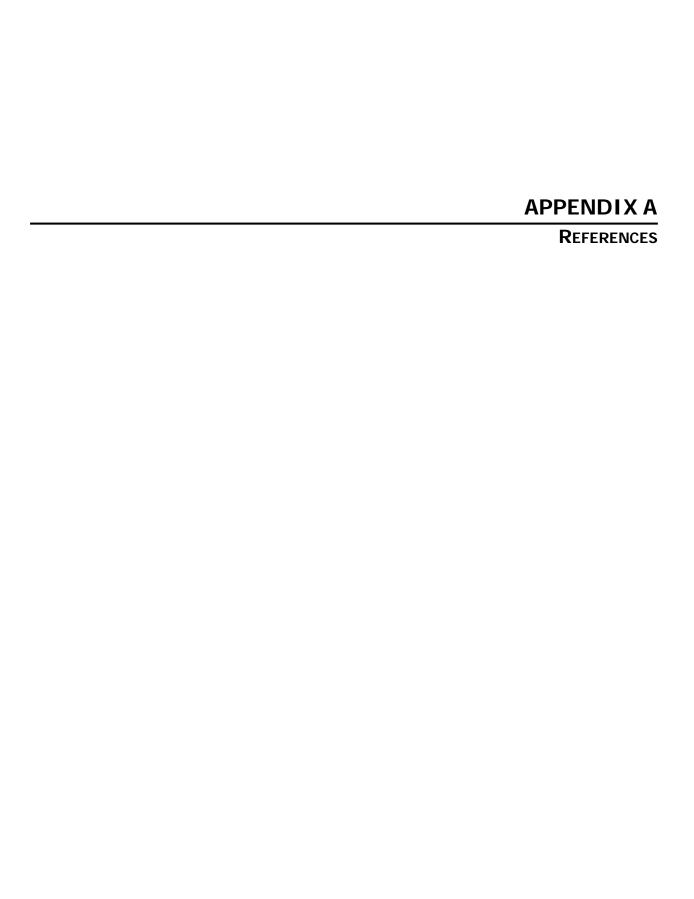

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in section 312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. My resume has been included in Appendix C.

APPENDIX B

GENERAL TERMS, CONDITIONS, AND LIMITATIONS

SCOPE OF SERVICES

This ESA was conducted in accordance with the American Society for Testing Materials International (ASTM) E 1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM Standard, 2013). ASTM E 1527-13 complies with U.S. Environmental Protection Agency (EPA) All Appropriate Inquiries (AAI) Final Rule (40 CFR 312), which was promulgated November 1, 2005 and went into effect November 1, 2006.

The scope of services for this ESA is as defined by ASTM E 1527-13. The following items are specifically excluded from the scope of ASTM E 1527-13, and were not assessed unless otherwise stated in the report: asbestos-containing materials, biological agents, cultural and historic resources, ecological resources, endangered species, health and safety, indoor air quality unrelated to hazardous substances or petroleum products, industrial hygiene, lead-based paint, lead in drinking water, mold, radon, regulatory compliance, and wetlands.

Unless otherwise described in the report, no sampling was conducted. Furthermore, no destructive activities were conducted to identify hidden or concealed conditions. Similarly, no removal of debris, finishes, or stored materials was performed.

Site reconnaissance of adjacent properties was limited to a general observation of land use activities from the subject property and/or public areas.

DEVIATIONS

No deviations or deletions from ASTM Standard E 1527-13 were made during preparation of this ESA.

LIMITING CONDITIONS

AECC has relied upon information provided by others in the assessment of environmental site conditions reported herein. AECC did not attempt to independently verify the accuracy or completeness of that information. To the extent that the opinion and conclusions in this report are based whole, or, in part, on such information, those conclusions are contingent on the accuracy and validity of the information provided to AECC. AECC assumes no responsibility for any consequence arising from any information or condition that was concealed, withheld, misrepresented, or otherwise not fully disclosed or available to AECC.

This report does not constitute legal advice. In addition, AECC makes no determination or recommendations regarding the decision to purchase, sell, or provide financing for the Site.

Per the ASTM Standard, no ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. The use of the ASTM Standard is intended to reduce, but not eliminate, this uncertainty.

The contents, opinions, and recommendations within this report are based on information available at the time of the assessment. AECC assumes no responsibility for any environmental concern or condition that results from additional information provided or activities that take place

APPENDIX B

GENERAL TERMS, CONDITIONS, AND LIMITATIONS

after the date of this report. If a reviewer of this report determines that information known to the reviewer is not contained in the report, such information shall be brought to the attention of AECC. AECC will evaluate such information and, on the basis of this evaluation, may elect to modify the findings and conclusions of the report.

The information provided by EDR in their search of state, federal, and tribal databases is limited to what has been reported or registered in each database.

Additional limitations noted in ASTM E 1527-13 and the authorized proposal (contract) associated with this project, including AECC's Terms and Conditions.

STANDARD CARE AND WARRANTIES

Within the limitations of the agreed-upon scope of work and the ASTM Standard, AECC has conducted this ESA in a professional manner, in accordance with generally accepted practices, using the degree of skill and care ordinarily exercised by environmental consultants under similar circumstances. In performing an environmental assessment bound by time and budgetary constraints, it is understood that a balance must be struck between a reasonable inquiry and an exhaustive analysis of each conceivable concern.

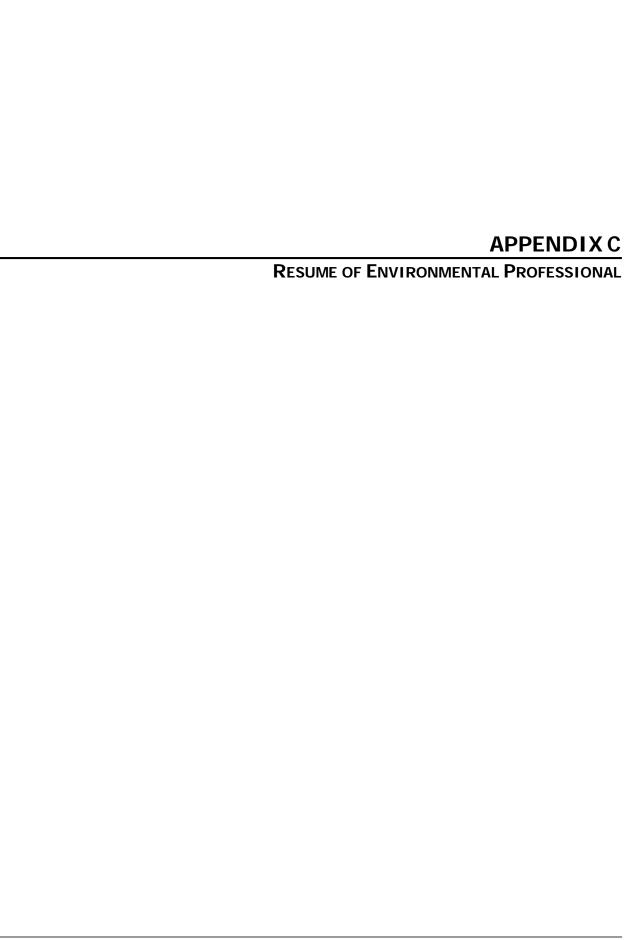

Due to physical limitations inherent to this, or any environmental assessment, AECC does not warrant that the Site is free of pollutants, or that all pollutants have been identified. The findings and conclusions stated herein must not be considered absolute certainties or facts, but rather as professional opinions based on the limited data obtained and reviewed during the assessment. As such, no absolute determination of environmental risks can be made. No other warranties, expressed or implied, are made.

RELIANCE

This report was prepared pursuant to a contract between AECC and our Client, and has been prepared by AECC for the express use of the Client. The contractual relationship included an exchange of information about the property, project, limitations, fees, liabilities, and / or insurance requirements that was unique and serves as the basis upon which this report was prepared. Because of the importance of these understandings, our assessment may not be sufficient for the intended purposes of another party.

No other parties shall rely on this report without the written consent from AECC and Client. Client may release this report to third parties; however, the report shall be transmitted in its entirety, and such third party, in using this report, shall have no legal recourse against AECC.

Third-party reliance letters may be issued upon timely request and payment of AECC's fee for such letters. All third parties relying on our report, by such reliance, agree that such reliance is limited by our proposal (contract) including AECC's Terms and Conditions and the general terms, conditions, and limitations contained herein.

RICHARD D. MCKENNA Environmental Project Manager

Mr. McKenna has over 16 years of environmental and industrial hygiene experience on projects that include asbestos, lead-based paint, mold, ionizing radiation, hazardous chemicals, and petroleum. He is certified to conduct asbestos building inspections, lead-based paint inspections, PCB inspections, mold inspections, asbestos design, lead-based paint design, environmental assessments and investigations, and compliance audits.

Mr. McKenna has performed/managed approximately:

- 400 Phase I Environmental Site Assessments (ESAs)
- 50 Phase II ESAs
- 150 Hazardous Materials Surveys
- 100 Hazardous Materials Designs
- 150 Property Condition Assessments/Physical Needs Assessments

Education

B.S., Chemical Engineering, Clarkson University, Potsdam, NY, 1994

Certifications

- NYSDOL Asbestos Inspector and Designer (#AH-01-16111)
- USEPA Lead Abatement Supervisor (#NY-S-122051-1)
- OSHA Lead Exposure in Construction Training
- OSHA Confined Space and Lock Out/Tag Out
- OSHA 10-Hour Construction
- OSHA Hazardous Waste Operations and Emergency Response (#136933)

Select Individual Project Experience

Mr. McKenna has worked on and/or managed the following environmental projects:

700 Outparcel

Brownfields Cleanup Program (No. C-724111) Syracuse, New York

Mr. McKenna was responsible for the application development, management, and field operations on this 0.43-acre commercial lot. The site was previously used for a gasoline service station in the 1950s and 1960s. After the removal of seven underground storage tanks, petroleum contaminants were identified on the site. Additional investigation and document review was completed to successfully fend off a pending law suit from the Attorney General. Mr. McKenna was responsible for the development of the Remedial Investigation report. Remedial alternatives are currently being developed and will coincide with planned site redevelopment.

Page | 2

City Crossroads Park Environmental Restoration Program (NYSDEC No. B-00146-7) Syracuse, New York

Mr. McKenna was responsible for the management and technical aspects of a 10-acre Brownfield project located in the former Erie Canal corridor. Activities included the development of health and safety plans, subcontractor procurement, sampling plans, evaluation of analytical laboratory data, and coordination of third party data validation. Mr. McKenna also provided funding assistance services, including grant writing. Investigations included sampling of groundwater and soil for polychlorinated biphenyls, metals, petroleum compounds, and asbestos. The project experienced added complexity due to on-going mulching operations located on the western half of the property.

Brown Manufacturing Environmental Restoration Program (NYSDEC No. B-00024-7) Syracuse, New York

Mr. McKenna was responsible for the Site Investigation/Remedial Alternatives Report (SI/RAR). Remediation of the site, which is located in a residential neighborhood, will include removal of petroleum and PCB-contaminated soil and groundwater, and the installation of a soil cover.

Phase I and Phase II Environmental Site Assessments Various Locations

Mr. McKenna maintains client relationships with attorneys, real estate developers, and financial lending institutions and has over the past three years has performed over 400 site assessments at project locations throughout the United States.

Industrial Park Phase I Environmental Site Assessment Cortland, New York

Mr. McKenna was responsible for the preparation of a Phase I ESA report for a 17-acre industrial park comprised of seven buildings. Historical sources revealed that the site supported heavy industrial operations since the late 1800s. Railroads, manufacturing facilities, and gasoline filling stations had occupied adjacent parcels. Adding to the complexity of the project, an adjacent property was listed as a Federal Superfund site. Due to the presence of coal tar compounds, PCBs, and heavy metals identified during a limited subsurface investigation, Mr. McKenna developed a comprehensive Phase II Environmental Assessment Work Plan and remedial cost estimation.

Former Automobile Filling Station Phase I/II Environmental Assessments Watertown, New York

Mr. McKenna was responsible for the management of Phase I and Phase II Environmental Site Assessments for a 0.5-acre former automobile filling station. Historical sources revealed that the site supported automobile repair and/or filling operations since the late 1920s. Previous environmental investigations also revealed that residual petroleum contamination was located at the property. Due to the presence of the residual contamination and lack of previous underground storage tank removal records, a limited subsurface investigation was conducted on the property. A ground penetrating radar survey identified subsurface anomalies and a test pit investigation was completed to investigate the anomalies. The investigation confirmed that although no further USTs existed at the property, residual contamination remained over the majority of the site.

Page | 3

Former Automobile Filling Station Phase II Environmental Site Assessment Elbridge, New York

A Phase I Environmental Assessment for an adjacent property revealed that the subject property had been utilized as an automobile filling station and that underground storage tanks were reported closed-in-place. Mr. McKenna managed the Phase II Environmental Site Assessment tasks that included underground storage tank removal and subsequent subsurface soil and groundwater investigation.

Former Petroleum Bulk Plant Remedial Activities Consulting and Oversight Angola, New York

As the Project Manager, Mr. McKenna coordinated the firm's environmental services to the client for subsurface investigations, groundwater monitoring, and remedial actions. Mr. McKenna was responsible for health and safety plans, sampling plans, QA/QC Plans, negotiations with the NYSDEC, client contact, management of the firm's field staff, and evaluation of analytical data.

Bass Pro Shop Expansion

Finger Lakes Mall Phase I/II Environmental Assessments and Remedial Actions Town of Aurelius, New York

Mr. McKenna was responsible for the preparation of the Phase I Environmental Site Assessment, which identified potential soil and groundwater impacts resulting from historic use of the site for vehicle maintenance. Mr. McKenna subsequently developed a Phase II Environmental Assessment program which identified petroleum-contaminated soil. Mr. McKenna worked closely with the developer, NYSDEC, remediation contractor, analytical laboratory, and landfill and to quickly prepare and execute a remedial plan that allowed site development to proceed on schedule.

Tappan Zee Bridge Emergency Lighting System Upgrades Environmental and Hazardous Materials Sampling Tarrytown, New York

As a Project Engineer, Mr. McKenna collected oil samples from several oil-bathed fuse assemblies along the span of the bridge, suspected of containing PCBs. In addition, Mr. McKenna performed demolition asbestos surveys of assemblies to be demolished. Upon receipt of the laboratory analyses, Mr. McKenna prepared abatement design drawings and specifications.

Educational Campus Underground Storage Tank Removal and Remedial Action Oversight Liverpool, New York

Mr. McKenna was responsible for contractor oversight during the removal of five underground storage tanks at three different locations and subsequent remedial actions at an educational campus. Mr. McKenna characterized soil conditions as a third party representative to the owner. During underground storage tank removal operations, petroleum contaminated soil was identified. A subsurface investigation was completed to delineate the extent of the contamination and identify appropriate remedial actions. Excavation in excess of 5,400 cubic yards of contaminated soil and treatment of several thousand gallons of groundwater were conducted on an expedited schedule to meets the owner's needs.

Page | 4

Town of Mentz Landfill Landfill Gas and Groundwater Monitoring Town of Mentz, New York

Mr. McKenna was responsible for Environmental Monitoring and Reporting Services compliance with the NYSDEC 6NYCRR Part 360 Permit issued to the Town of Mentz landfill. Mr. McKenna was instrumental in obtaining a variance from the NYSDEC for reduction of the scope of the post-closure monitoring of groundwater and landfill gas.

Electronics Park SPDES Monitoring Syracuse, New York

Mr. McKenna was responsible for evaluating analytical data for the on-going stormwater monitoring program associated with the SPDES permit for this project, and coordinating additional monitoring events when parameters exceed permitted limits.

Hancock International Airport Annual SPDES and MOSF Monitoring and Reporting Salina, New York

Mr. McKenna managed Environmental Monitoring and Reporting Services for a fuel farm, which included the collection and analysis of monthly oil water separator effluent results. These results were compared to requirements within a site-specific SPDES Permit. Mr. McKenna was also responsible for the annual monitoring of groundwater at four monitoring wells located around the perimeter of the above ground storage tank fuel farm, and subsequent reporting in accordance with NYSDEC Major Oil Storage Facility Monitoring Program requirements.

Fort Drum Cantonment Area Industrial Storm Water Pollution Prevention Plan (SWPPP) Fort Drum, New York

The Fort Drum Cantonment Area is made up of over 135 facilities which are located in a 9,000-acre watershed. To add to the complexity of the SWPPP, the watershed is comprised of 59 subwatersheds. Mr. McKenna prepared the SWPPP Report and was responsible for field investigations, site characteristics review, identification of potential pollutant sources, and identification of stormwater controls, such as best management practices.

Alfred University SPCC Plan Alfred, New York

Mr. McKenna prepared an SPCC Plan that included modifications to facilities at the University. Mr. McKenna worked closely with University staff to collect information and to develop spill prevention strategies and practices and procedures for countermeasures in the event that a spill occurred. The Plan encompassed the educational campus, which consists of 66 buildings, and a separate Motor Pool parcel.

North Country Community College Spill Prevention Control and Countermeasure (SPCC) Plan Saranac Lake, New York

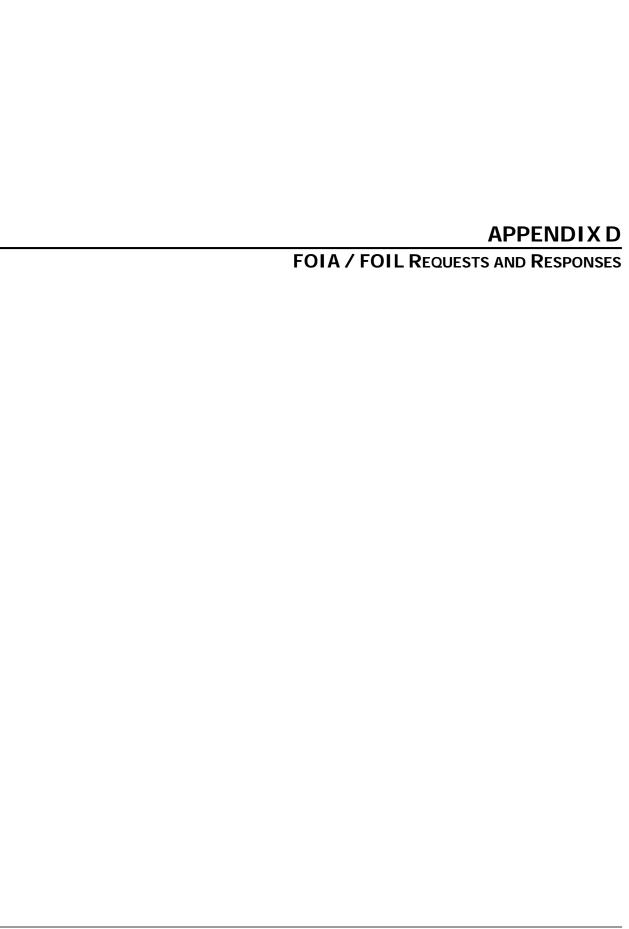

Mr. McKenna managed an updated SPCC Plan to incorporate changes in the regulations and modifications to bulk storage containers at an educational campus. Mr. McKenna identified and collected necessary information and to developed spill prevention strategies and practices, and procedures for countermeasures in the event that a spill occurred.

Page | 5

Air Force Research Laboratory Hazardous Materials Survey and Design Rome, NY

Reviewed existing hazardous materials surveys, performed hazardous materials surveys, and prepared plans, specifications, and estimates for various renovation and demolition projects in vacant and occupied buildings. Projects included assessment of asbestos, lead, PCBs, and ionizing radiation in building materials. In addition, and soil and groundwater in the vicinity of drywells were sampled and analyzed for solvents, PCBs, metals, and ionizing radiation.

Ms. Helen A. Bartone, County Clerk Montgomery County Office Building PO Box 1500 – 64 Broadway Fonda, NY 12068-1500

Re: Former Beech-Nut Foods Facility, 68 Church Street, Canajoharie, NY 13317

Tax ID: 63.14-1-9.1

Dear Ms. Bartone,

We are writing to request records pursuant to the Freedom of Information Act relative to the above-referenced Site.

We would be interested in obtaining any of the following records and reports that may exist:

- Storage of hazardous substances and/or petroleum products (tank installations, registrations, etc.)
- Soil / groundwater contamination and remedial action documentation
- Indoor air quality (asbestos, mold, radon, vapor intrusion)
- Land development (sewer / septic, water supply, SPDES, etc.)
- Contaminated wells within 1/4 mile of the site
- Landfills within 1/4 mile of the site

It is believed that the following departments and agencies may be best able to respond with the information desired:

- Agricultural District
- Fire Service
- Solid Waste
- Public Health
- Soil and Water Conservation / National Resource Conservation

If you should have any questions, please do not hesitate to contact our office at (315) 432-9400. Electronic correspondence at the email address listed below is preferred. Thank you for your time and assistance.

Sincerely,

Asbestos & Environmental Consulting Corporation

FOIL #: 15-10-293 Re: Former Beech-Nut Foods Facility 68 Church Street, Canajoharie, NY 13317

Dear Mr. Brantner:

This letter responds to your Freedom of Information Law request of October 22, 2015, in which you requested environmental records for the above referenced address. I have enclosed documents responsive to your request. Some records have been redacted and/or withheld pursuant to New York Public Officers Law § 87(2)(g).

Please be advised the address is served by Canajoharie (V) Water Works' public water system, NY2800137. Any violation reports for the public water system can be found at:

http://www.health.ny.gov/environmental/water/drinking/violations/previous_compliance_reports.htm.

The Records Access Office suggests you contact both the Montgomery County Department of Health (MCDOH) and the New York State Department of Environmental Conservation (NYSDEC), as they may be able to assist you with your request. The phone number for the MCDOH is: (518) 853-3531. The phone number for the NYSDEC is: (518) 402-9522. The email address for the NYSDEC is: access.records@dec.ny.gov.

Should you feel you have been unlawfully denied access to records, you may appeal such denial in writing within 30 days to the Records Access Appeals Officer, Division of Legal Affairs, Empire State Plaza, 2438 Corning Tower, Albany, New York 12237-0026.

If you require additional information or wish to discuss this matter further, please do not hesitate to contact me at: (518) 474-8734.

Sincerely

Danielle L Rysedorph, Esq.

From: Tracey Hitchen Boyd [mailto:Boyd@nysefc.org]

Sent: Thursday, November 20, 2008 5:10 PM

To: jbrust@delawareengineering.com; Bass, Lynn

Cc: Christopher Rienzo

Subject: Estimated Restructuring Results for Canajoharie.

Dear John and Lynn,

In response to the Village's anticipated difficulties resulting from the loss of revenue for its drinking water system, and as discussed with the Village of Canajoharie, the Village may pursue the restructuring of its existing Drinking Water State Revolving Fund (DWSRF) debt (originally financed with SRF series 1998D and 1999A bonds).

New, extended-term financing is the option available to Canajoharie currently through the NYS Environmental Facilities Corporation (EFC). Specifically, market conditions permitting, EFC is able to refund the bonds associated with remaining \$2,595,000 on the Village's two DWSRF loans to extend the repayment terms and provide cash flow relief to the Village. Under this scenario, the Village would receive interest subsidy on the principal payments through 2016, and repay the remaining loan balance (beyond 2016) at EFC's triple-A (but unsubsidized) rates. The viability of this option is based on our current information about the projects and the various factors which effect SRF eligibility and the options permitted under applicable statutes including NYS local finance law,

Estimated debt service savings for loans restructured with an SRF extended term guarantee are reflected in the schedule, attached. Significant annual cashflow savings result for the Village for the first several years, (subject to change based on market conditions at the time of refunding and the structuring of principal payments). This option, should the Village chose to pursue it, requires a significant lead time.

Separately, eligibility for DWSRF Hardship Financing terms is based on current conditions. Once the future costs and revenues for the system are known (with the departure of BeechNut), those factors may impact the financial assistance available for Canajoharie's eligible SRF project(s). The availability of DWSRF hardship funds is also subject to the funding line limitations in any given year. Finally, if the SRFs were to receive new federal funding, as is currently proposed, this may alter the financial assistance that EFC is able to provide. Please keep

in mind, however, that completed projects may be a lower priority for such expanded assistance.

We hope that this information is helpful. Please let us know if you have any

questions. Best Regards, Tracey

Subject: Estimated Restructuring Results for Canajoharie.

Dear John and Lynn,

In response to the Village's anticipated difficulties resulting from the loss of revenue for its drinking water system, and as discussed with the Village of Canajoharie, the Village may pursue the restructuring of its existing Drinking Water State Revolving Fund (DWSRF) debt (originally financed with SRF series 1998D and 1999A bonds).

New, extended-term financing is the option available to Canajoharie currently through the NYS Environmental Facilities Corporation (EFC). Specifically, market conditions permitting, EFC is able to refund the bonds associated with remaining \$2,595,000 on the Village's two DWSRF loans to extend the repayment terms and provide cash flow relief to the Village. Under this scenario, the Village would receive interest subsidy on the principal payments through 2016, and repay the remaining loan balance (beyond 2016) at EFC's triple-A (but unsubsidized) rates. The viability of this option is based on our current information about the projects and the various factors which effect SRF eligibility and the options permitted under applicable statutes including NYS local finance law,

Estimated debt service savings for loans restructured with an SRF extended term guarantee are reflected in the schedule, attached. Significant annual cashflow savings result for the Village for the first several years, (subject to change based on market conditions at the time of refunding and the structuring of principal payments). This option, should the Village chose to pursue it, requires a significant lead time.

Separately, eligibility for DWSRF Hardship Financing terms is based on current conditions. Once the future costs and revenues for the system are known (with the departure of BeechNut), those factors may impact the financial assistance available for Canajoharie's eligible SRF project(s). The availability of DWSRF hardship funds is also subject to the funding line limitations in any given year. Finally, if the SRFs were to receive new federal funding, as is currently proposed, this may alter the financial assistance that EFC is able to provide. Please keep in mind, however, that completed projects may be a lower priority for such expanded assistance.

We hope that this information is helpful. Please let us know if you have any questions. Best Regards, Tracey

Subject: Estimated Restructuring Results for Canajoharie.

Dear John and Lynn,

In response to the Village's anticipated difficulties resulting from the loss of revenue for its drinking water system, and as discussed with the Village of Canajoharie, the Village may pursue the restructuring of its existing Drinking Water State Revolving Fund (DWSRF) debt (originally financed with SRF series 1998D and 1999A bonds).

New, extended-term financing is the option available to Canajoharie currently through the NYS Environmental Facilities Corporation (EFC). Specifically, market conditions permitting, EFC is able to refund the bonds associated with remaining \$2,595,000 on the Village's two DWSRF loans to extend the repayment terms and provide cash flow relief to the Village. Under this scenario, the Village would receive interest subsidy on the principal payments through 2016, and repay the remaining loan balance (beyond 2016) at EFC's triple-A (but unsubsidized) rates. The viability of this option is based on our current information about the projects and the various factors which effect SRF eligibility and the options permitted under applicable statutes including NYS local finance law,

Estimated debt service savings for loans restructured with an SRF extended term guarantee are reflected in the schedule, attached. Significant annual cashflow savings result for the Village for the first several years, (subject to change based on market conditions at the time of refunding and the structuring of principal payments). This option, should the Village chose to pursue it, requires a significant lead time.

Separately, eligibility for DWSRF Hardship Financing terms is based on current conditions. Once the future costs and revenues for the system are known (with the departure of BeechNut), those factors may impact the financial assistance available for Canajoharie's eligible SRF project(s). The availability of DWSRF hardship funds is also subject to the funding line limitations in any given year. Finally, if the SRFs were to receive new federal funding, as is currently proposed, this may alter the financial assistance that EFC is able to provide. Please keep in mind, however, that completed projects may be a lower priority for such expanded assistance.

We hope that this information is helpful. Please let us know if you have any questions. Best Regards, Tracey

Re: Beech Nut property SBL #63.14-1-9.1

Dear Sir or Madam:

Pursuant to your FOIL request dated October 21, 2015, the following documents are enclosed:

Property Record Card

At this time, the Town of Canajoharie is in the process of a Town-wide reassessment project. Therefore, the records for this piece of property are in the possession of the company conducting the reassessment. It is anticipated that the reassessment project will conclude late Spring, 2016.

If you choose to resubmit a FOIL request in late Spring or early Summer 2016 for the documents that cannot be searched for at this time, please be specific regarding the dates of the records you seek (ie: land title records from 1950.)

Truly,

Laurie M. Vroman

Canajoharie Town Clerk

Ms. Maria Nestle Secretary Canajoharie Volunteer Fire Department PO Box 28 75 Erie Boulevard Canajoharie, NY 13317

Re: Former Beech-Nut Foods Facility, 68 Church Street, Canajoharie, NY 13317

Dear Ms. Nestle,

As a part of an environmental report that we are preparing, we are writing to request records pursuant to the Freedom of Information Act relative to the above-referenced Site.

In particular, are interested in obtaining Site records indicative of the following, if any such records are on file with the Department:

- Storage of hazardous substances and/or petroleum products (eg, tank registrations, tightness testing, inspections, etc.);
- Releases of hazardous substances and/or petroleum products at the Site (eg, leaking underground storage tanks, tank removal and associated analytical testing, etc.);
- Subsurface investigations (eg., soil and/or groundwater testing) at the Site;
- Site contamination and remedial action (eg, reports);
- Contaminated wells (eg, public or private) on-Site

If you should have any questions, please do not hesitate to contact our office at (315) 432-9400. Electronic correspondence at the email address listed below is preferred. Thank you for your time and assistance.

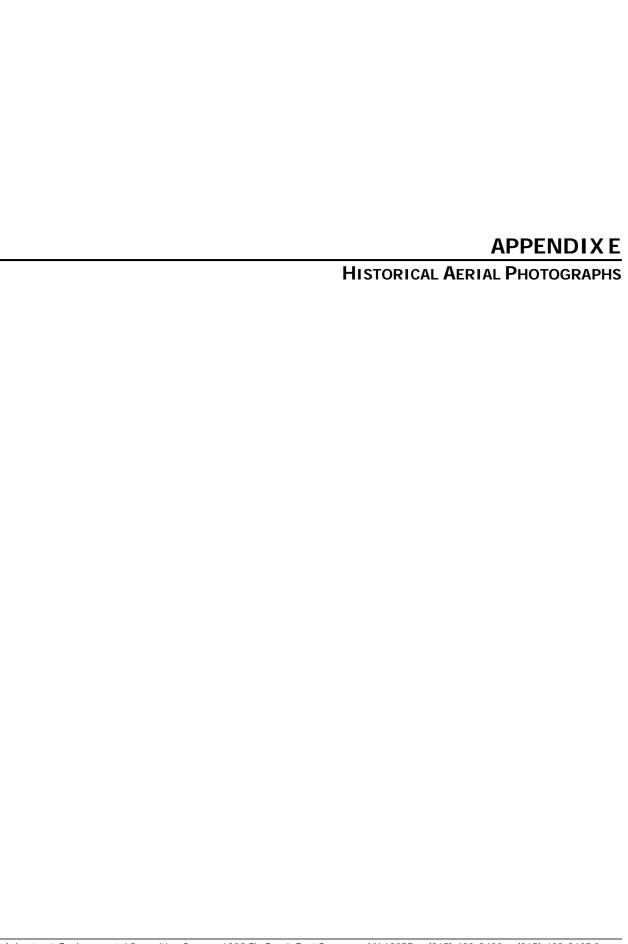

Sincerely.

Asbestos & Environmental Consulting Corporation

The EDR Aerial Photo Decade Package

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050 with any questions or comments.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report AS IS. Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Asbestos & Environmental Consulting Corp were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in bold italics are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/10/2015 has revealed that there is 1

RCRA-LQG site within approximately 0.25 miles of the target property.

State and tribal leaking storage tank lists

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 05/18/2015 has revealed that there are 6 NY LTANKS sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/10/2015 has revealed that there are 3 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there is 1 EDR US Hist Auto Stat site within approximately 0.25 miles of the target property.

DEC Memo: 2008-09-26 9:56 AM TK called sheriff dispatch for additional

information. A passerby noticed fuel oil flowing across facility into storm drain. Called 911. TK paged Matt Franklin to provide possible follow up after meeting in schenectady. Awaiting call back from Matt.MF on site. Spill result of pump handle being left locked open during filling of truck. Spilled material went done driveway. None appears to have entered catch basin. Total amount pumped was 14 gallons. Some of that made it into truck being filled. Clean up nearly complete upon arrival. Owner of station are going to remove lock from pump handle to avoid this in the future. They are going to properly dispose of speedy dry and pads. (PBS 4-600904)Close.

Remarks: Caller states due from unknown circumstances 911 dispatcher states a

fuel spill at above location.

MS telecon with fire chief. Spill onto pavement. Speedy dry applied. DEC Memo:

FD happy with the clean up. They are going to advise the station owner that he is responsible for the clean up. I advised the FD to contact me if there is any porblems. Also, this event happened during a tremendous snow storm - 2-3 feet of snow headed for the area. Road

conditions very bad. Closed based on info.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Annual Waste Handled:

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Amount (Lbs): 5880

D002 Waste code:

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS

> CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN

Direction Distance Elevation

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major

redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR SYNTHETIC MINOR

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

> "KOKOCKI"SEE 8802484, 9907137. [VOGHT'S GARAGE & CORNERSTONE -RICHARD WEIGEL; SUNOCO & XTRA MART - MID VALLEY]7/10/96 PAYMENT INVOICE (D100812) - DATED 7-9-96 NOT AUTHORIZED BY CONTRACTOR

RETURNED TO CONTRACTOR FOR SIGNATURE.

04/98 TK REVIEWED FILE. THE FOLLOWING IS A NARRATIVE OF SITE

ACTIVITIES.

10/89 THE DEPARTMENT RECEIVED LETTER DATED 7-6-89. THE LETTER WAS SENT BY HERKIMER PETROLEUM PRODUCTS INC. TO MR. RICHARD WEIGEL. MR. WEIGEL FORWARDED A COPY OF LETTER TO THE DEPARTMENT. THE LETTER INDICATES THAT A FACILITY UPGRADE IS SCHEDULED TO BEGIN IN EARLY AUGUST 1989.08/22/89 TK ON SITE. CENTRAL TANK AND PUMP ON SITE EXCAVATING OLD PETROLEUM BULK STORAGE TANKS AND RELATED PIPING. PETROLEUM CONTAMINATED SOIL ENCOUNTERED DURING FACILITY UPGRADE.08/28/89 REMOVAL AND INSTALLATION OF PETROLEUM BULK STORAGE TANKS PROGRESSING SATISFATORILY. SITE CLEANUP IS ALSO MOVING ALONG. SOIL IS BEING TRANSPORTED TO ANOTHER PROPERTY LOCATED IN REGION 4. THREE SITE WELLS WILL BE CONSTRUCTED, IN-SITU SOIL VENTING WILL BE USED TO TREAT RESIDUAL PETROLEUM CONTAMINATED SOIL.08/31/89 PETROLEUM CONTAMINATED SOIL WAS TAKEN TO AN OFF SITE LOCATION FOR TREATMENT. AN EMERGENCY WASTE TRANSPORTER PERMIT WAS ISSUED TO CENTRAL PUMP AND TANK, 09/08/89 THREE SITE WELLS AND A SOIL VENT SYSTEM WERE INSTALLED BY CENTRAL PUMP AND TANK. UNDER THE ADVISE OF MR. BRUCE BULL OF HERKIMER PETROLEUM, MR. WEIGEL HIRED CLEANHARBORS TO PROVIDE THE ENVIRONMENTAL CONSULTING AND SITE REMEDIATION. 11/22/89 THE DEPARTMENT RECEIVED GROUNDWATER SAMPLING DATA FROM WATER SAMPLES COLLECTED ON 10-19-89. ALL THREE SITE WELLS WERE CONTAMINATED AS INDICATED BY THE LABORATORY ANALYSIS. EPA METHOD 602 WERE USED TO ANALYZE THE WATER SAMPLES. TOTAL HYDROCARBONS WERE AS FOLLOWS; MW-1 Map ID MAP FINDINGS

S103478069

17,200 PPB; MW-2 88,300 PPB; MW-3 35,400 PPB.01/09/90 TK, BRAD BALZER - CLEANHARBORS, AND MR. WEIGEL MET TO DISCUSS TREATMENT OPTIONS. THE DEPARTMENT IMPLEMENTED A JULY 1, 1990 DEADLINE TO HAVE BOTH A GROUNDWATER TREATMENT SYSTEM AND AN UPGRADED SOIL VENTALATION SYSTEM IN OPERATION. A FOLLOW UP LETTER DATED 2-27-90 WAS SENT TO MR. WEIGEL AFTER THE 1-9-90 MEETING EXPLAINING THAT AN UPGRADED VENTING SYSTEM WOULD SATISFY DEC REQUIREMENTS AT THE PRESENT TIME.02/19/90 THE DEPARTMENT ASSUMED CONTROL OF THE SITE REMEDIATION EFFORTS. MR. WEIGEL INDICATED THAT HE COULD NO LONGER AFFORD TO PROCEED WITH THE NECESSARY WORK. THE DEPARTMENT HIRED CLEAN HARBORS TO CONTINUE WITH SITE PROJECT. THE VAPOR EXTRACTION SYSTEMS WERE UPGRADED WITH LARGER VACCUM PUMPS.04/09/90 THE LARGER SYSTEMS WERE INSTALLED AND OPERATIONAL.04/23/90 HNU READINGS FROM BOTH VES SYSTEMS WERE RECORDED. THE FRONT SYSTEM WAS 106 PPM. WHILE THE BACK SYSTEM WAS 81 PPM.05/23/90 ALL THREE MW'S WERE SAMPLED ON 5-22-90 USING EPA METHOD 503.1. MW-2 WAS THE MOST IMPACTED WELL ON SITE. MW-1 MET STANDARDS AND MW-3 WAS SLIGHTLY ABOVE REGULATORY STANDARDS.06/20/90 CLEANHARBORS CHECKED SITE AND TOOK HNU READINGS FROM VES SYSTEMS.08/06/90 MR. WEIGEL COMPLAINED OF UTILITY BILL FOR RUNNING VES SYSTEMS AND REQUESTED THEY BE REMOVED AND CHEAPER IN LINE BLOWES INSTALLED. THE TWO 1 HORSEPOWER BLOWERS WERE DISCONNECTED AND REMOVED. MR. WEIGEL INSTALLED TWO INLINE BLOWER UNITS.06/03/91 MR. WEIGEL SUBMITS SOIL SAMPLE ANALYSIS TO THE DEPARTMENT FOR REVIEW. THE SOIL MEETS THE STARS GUIDANCE VALUES.05/29/92 THE DEPARTMENT COLLECTS GROUNDWATER SAMPLING DATA. LEVELS OF DISOLVE ARE SLIGHTLY EXCEEDING REGULATORY STANDARDS. CONTINUED MONITORING IS NEEDED. 06/16/93 INTERIM ISR SUBMITTED.11/19/93 THE DEPARTMENT REINSTALLES (2) 1 HORSE VAPOR EXTRATION BLOWERS. TWO INCLOSURES ARE CONSTRUTED TO PROTECT THE TREATMENT SYSTEMS. VAPOR EXTRACTION SYSTEMS ARE SAMPLED BY THE DEPARTMENT ON A MONTHLY SCHEDULE.10/25/94 THE BILLING INVOICE INCLUDED A CORRECTION CONCERNING THE DATA FOR THE VAPOR EXTRACTION SYSTEMS, THE TWO BLOWERS HAD BEEN INCORRECTLY IDENTIFIED, SYSTEM 1 WAS BEHIND THE BUILDING AND SYSTEM 2 WAS LOCATED AT THE POINT.11/01/94 THE DEPARTMENT INFORMS CLEANHARBORS TO BEGIN SAMPLING THE THREE SITE WELLS ON A QUARTERLY BASIS. VES IS MONITORED ON A MONTHLY BASIS. 11/28/94 THE DEPARTMENT SAMPLED SITE MONITORING WELLS. PETROLEUM DISSOLVE LEVELS WERE SLIGHT. GROUNDWATER QUALTITY DOES NOT MEET STANDARDS. SITE REMEDIATION CONTINUES.**** FROM NOVEMBER 94 TO MARCH 96 CLEANHARBORS SUBMITTED MONTHLY REPORTS TO THE DEPARTMENT ALONG WITH THE BILLING **************03/11/96 CLEANHARBORS SUBMITS REPORT CONCERNING SYSTEM OPERATION DURING FEBRUARY 96. THE SYSTEMS OPERATED CONTINUOUSLY THROUGH THE PERIOD AND NO MAINTENANCE WAS REQUIRED. ON 2-19-96 CHI ATTEMPTED TO SAMPLE THE THREE WELLS ON SITE, BUT ALL THREE WERE DRY. CHI RECOMMENDS TAKING A QUANTITIVE AIR SAMPLE FROM THE TWO VES SYSTEMS PRIOR TO REMOVAL. 04/08/96 CLEANHARBORS SUBMITS REPORT CONCERNING SYSTEM OPERATION. FOR MONTH OF MARCH. ON 3-29-96 ALL THREE WELLS WERE STILL DRY. THE LOCKS ON THE MOHAWK RIVER ARE TO BE CLOSED IN MAY THE WELLS WILL BE SAMPLED AT THAT TIME. IT IS EXPECTED THAT THE WATER LEVELS IN THE WELLS WILL BE HIGHER ONCE THE LOCKS ARE CLOSED.04/11/96 CLEANHARBORS IS DIRECTED TO DISCONTINUE THE OPERATION OF THE VES AND NO ANALYTICAL IS NEEDED. HOWEVER, ONCE THE WELLS HAVE WATER, THEY ARE TO BE SAMPLED.05/14/96 CLEANHARBORS REPORTS THAT THE VES IS SHUT DOWN AND THE WELLS WERE SAMPLED ON 5-9-96.05/23/96 THE DEPARTMENT RECEIVED GROUNDWATER SAMPLING DATA FROM SAMPLING TAKEN ON 5-9-96. NO FURTHER SITE CLEANUP IS REQUIRED. GROUNDWATER DOES NOT MEET STANDARDS. PETROLEUM DISSOLVE LEVELS ARE VERY SLIGHT.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

State and tribal voluntary cleanup sites

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

State and tribal Brownfields sites

ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Elevation: 300 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map: 5940003 CANAJOHARIE, NY

Version Date: 2013

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

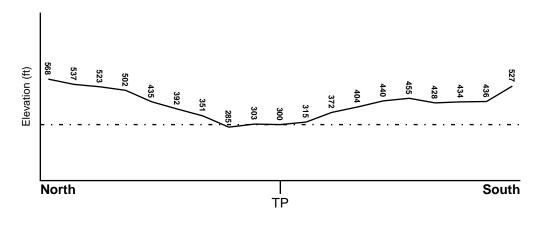

TOPOGRAPHIC INFORMATION

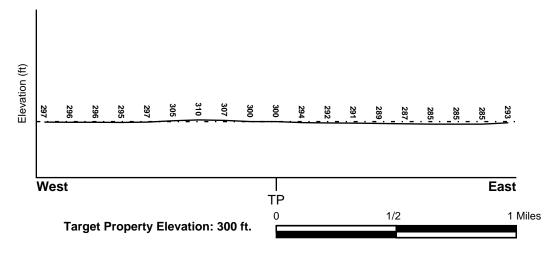

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

Data Coverage

CANAJOHARIE

YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

 The state of the

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Udorthents

Soil Surface Texture: gravelly loam

Hydrologic Group: Class A/D - Drained/undrained hydrology class of soils that can be

drained and are classified.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 137 inches

Soil Layer Information								
	Воц	ındary		Classification		Saturated hydraulic		
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	conductivity micro m/sec	Soil Reaction (pH)	
1	0 inches	3 inches	gravelly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Clayey Gravel	Max: 141 Min: 0.42	Max: 7.3 Min: 4.5	
2	3 inches	70 inches	very gravelly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 42 Min: 0.42	Max: 8.4 Min: 4.5	

Soil Map ID: 2

Soil Component Name: Water

Soil Surface Texture: gravelly loam

Hydrologic Group: Class A/D - Drained/undrained hydrology class of soils that can be

drained and are classified.

Soil Drainage Class:

Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 3

Soil Component Name: Rock outcrop

Soil Surface Texture:

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high

water table, or are shallow to an impervious layer.

Soil Drainage Class: Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.
